info@bestcremationservice.com

Best Cremation Service assists families throughout the State of Ohio. \$1196.04 is really your total cost (unless you add something more).

Shipping is Easy

Cremated remains can be delivered via USPS anywhere within the continental United States. If desired, an additional \$185 is charged for this service. Or, a designated individual can collect the cremated remains at no charge from us once our services are complete.

Alternative Options

Solidified remains are an alternative to traditional cremated remains. The solidification process compresses conventional cremated remains into a beautiful collection of 40-60 “stones” that you can hold, share, scatter, and travel with. If desired, this service is an additional \$895.

Away From Home Protection

Many families think selecting services with a Funeral Director and pre-paying secures today’s pricing. However, actual costs can be much higher if you are not close to home at the time of need. That's why our Away From Home protection is critical. When making arrangements in advance, a one-time payment of \$450 guarantees prices if you were to pass away more than 75 miles from home, anywhere in the world, and need to be transported home.
